

Eurostick S.p.a. – Preview Swimwear + Beachwear 2022

SUSTAINABILITY COMMITMENT

We strongly believe in the importance of enforcing a sustainable development model. We are pleased to announce that we have obtained the **Global RecycleStandard (GRS)**, which provide verification of recycled materials, and then track the material through to the final product.

Eurostick's recycled polyester fabrics include Swimwear fabrics Denis (140 gr/m²) and Alan (180 gr/m²), together with a new lining fabric Toro (100 gr/m²) and Beachwear fabrics Collin (80gr/m²) and Morris (65gr/m²).

Finally we are in process to receive the GRS certification for our sublimation printing process.

COLLECTION MOOD

The 2022 Swim and Beach collections see our focus on three main themes:

1) SEA THEME

We have developed this theme printing sailing boats, corals and seabeds with sea colours, both for Swimwear (on our bestsellers Tenerife and Amalfi) and Beachwear (Collin and Veletta)

2) RADICAL ROMANCE

We have developed this theme by focusing on prints with funny Vichy design, stripes design and jeans effect prints for Swimwear (on our Amalfi) and Beachwear (on our Nobel fabric in Viscose and fewlaces in Retro Style)

3) EXOTIC MOOD

We have developed this mood with prints of exotic flowers, flamingos and butterflies for swimwear (Amalfi and suede like Castello) and beachwear (Veletta chiffon)
