

INNOTEX & MERKEL GMBH

The Innotex Beachwear collection 2022 presents itself multifaceted in colour and design language.

In addition to classic Tie Dye motifs, soft watercolour flows, painterly impressions and high-contrast graphic elements, the diverse interpretations of flora and fauna dominate.

Our colour palette ranges from warm red, earth and olive tones to the classic beach colours to expressive colour explosions.

The multi-layered Innotex product portfolio of high-quality jersey, viscose, cotton and silk qualities enables various combinations of beach dress, pareo or tunic with any variation of swimwear.

In the course of the sustainability of textiles, we also offer our customers diverse qualities made from recycled materials.

Innotex is presenting an extension in its range this year with an independent Active Wear collection.
