

## NEXTIL GROUP

### 2022 PRINTS COLLECTION P&H SHIELD

Every passing year, trends are governed more by body types than fashion trends. Companies strive to include all bodies by offering different patterns, which is why the swimsuit is gaining ground in the bikini, that is the reason why in our swimwear collection we have included larger prints with bigger rapport.

Due to the COVID-19, the public needs timeless patterns and prints, both in terms of fashion and the quality concept of the fabrics.

Our main themes of the prints to be highlighted would be:

- **A NEW RETRO:** bright and soft colors mixed with grayish and brownish colors with a very simple drawings
- **LUXURY AT HOME:** dots and animal prints will give us this touch of simple glamour
- **NATURAL:** we need to reconnect with ourselves and our natural world, this line is much calmer and with natural effects
- **MYSTICAL JUNGLE:** all the tropical ever, but much more seductive and enigmatic
- **FLOWER FLOWER:** we need the power of all the flowers, big, small, retro, old... to feel happy and natural
- **AROUND THE WORLD:** we stay at home, but with ethnic prints that give us the idea of exotic trips and a nomadic feeling

Also in NEXTIL GROUP have worked to improve its processes and adapt its fabrics to this new phase we are entering after the lockdown. In this new post-COVID period, we are committed to improving the properties of our fabrics in general and those related to hygiene and protection from external agents in particular. As a result of our research in this area, we have created the **P&H SHIELD** concept, Protective & Hygienic Shield
